

Code : Problem 6

Name : Gangurde Vaishnavi Bharat

Roll No : 25

Div : C

"""

Problem Statement : To accept a number from user and print digits of a number in a reverse order.

"""

Solution :

```
Number = int(input("Enter the integer Number :"))
Reverse_number = 0
while Number > 0:
    Remainder = Number % 10
    Reverse_number = (Reverse_number*10) + Remainder
    Number = Number//10
print("The Reverse number of entered number is ",
Reverse_number)
```

"""

Output :

Enter the integer Number :789

The Reverse number of entered number is 987

"""
